Commentary

The Fund gained 5.1% over the month of April (net of all fees and expenses).

The Fund's strategy of owning a concentrated portfolio of great businesses continues to reward our clients. Two of our core holdings increased by 36% and 16%, respectively, while one of our two short investments decreased 14% over the month.

The Fund is in the middle of purchasing a new holding with excellent financial metrics, great reinvestment opportunities and strong management.

Over 24% of the Fund's assets are in cash, and we continue to search for new businesses in which to deploy this capital.
