Investment Methodology

The Good Opportunities Fund (the Fund) aims to achieve above-market returns by focusing on the 10 to 15 best investment opportunities available. The Fund incorporates a value-oriented fundamental research approach to identify compelling long and short investments, and uses a concentrated portfolio to outperform broader indices.

Historical Performance (% net of all fees)

	Fund	S&P/TSX Comp TRI	S&P 500 TR
Year to Date	18.6	10.3	25.3
1 month	1.7	4.7	4.6

A redemption charge may be charged on units tendered for redemption within the first year following their purchase at the rate of 2.5% during the first 90 days, 2% during days 91-180 and 1% during days 181-365. See "Redeeming Units - Short Term Trading Fee" in the Fund's Offering Memorandum. The above performance figures are net of management fees and performance fees. Please review the Good Opportunities Fund Offering Memorandum for detailed descriptions of strategies, objectives, and risk factors. The above is provided for informational purposes only and is qualified in its entirety by the Fund's Offering Memorandum. Past performance may not be indicative of future results and there is no assurance that any of the Fund's investment objectives will be met. We have cited common indices used in Canada for general comparison with our fund. However, our fund may not necessarily be representative of the indices used and the volatility of our portfolio may vary substantially compared to these indices for reasons which include, but are not limited to: (i) our fund may hold or have held a larger percentage of small cap securities and a higher concentration in specific securities and industries; (ii) our fund may use short selling and leverage strategies and hold private investments. The S&P 500 Index measures the total return of the broader U.S. economy through changes in the aggregate market value of 500 stocks representing all major industries and assumes reinvestment of dividends. The S&P/TSX Composite Total Return Index measures the total return of the broader Canadian economy through changes in the aggregate market value of stocks and assumes reinvestment of dividends.

Commentary

The Fund gained 1.7% over the month of October. The stock prices of two of the Fund's investments increased materially. Both our short investments increased as well, which negatively impacted performance. After reviewing one of the Fund's short positions, we believed it was no longer a suitable Fund holding, and covered the entire position.

During the period, we added a new core investment that we believe offers superb economics, an excellent business model and a long runway of future cash flow growth.
